

Warm-up

- Discuss with your direct neighbour(s) the following questions for the next 10 minutes:
 - Why have you become a teacher?
 - What is your best citizenship education experience?
 - What is your worst citizenship education experience?

What is citizenship education?

Content, organization, challenges

Citizenship education, what do we mean?

- Active and responsible citizens
- Social, economic, legal and political
- Global developments and sustainability
- 4 D's: democracy, diversity, duties and doing (Richardson, 2010)

Two types of competences (Ten Dam & Volman, 2007):

1. Interpersonal competences
2. Societal competences

Citizenship, what do we mean?

- **Status- rights: Citizen of**
- **Citizenship as a role of practice**
Participation - maintain and safeguard
democracy at all levels

“Democratic teaching of citizenship”: What do we mean?

- Political system
- Duties and rights
- Participation
- Dialog and deliberation
- Culture and lifestyle (equality, mutual respect and inclusion)
- Minority rights (Lenz, 2021)

Why is citizenship education important?*

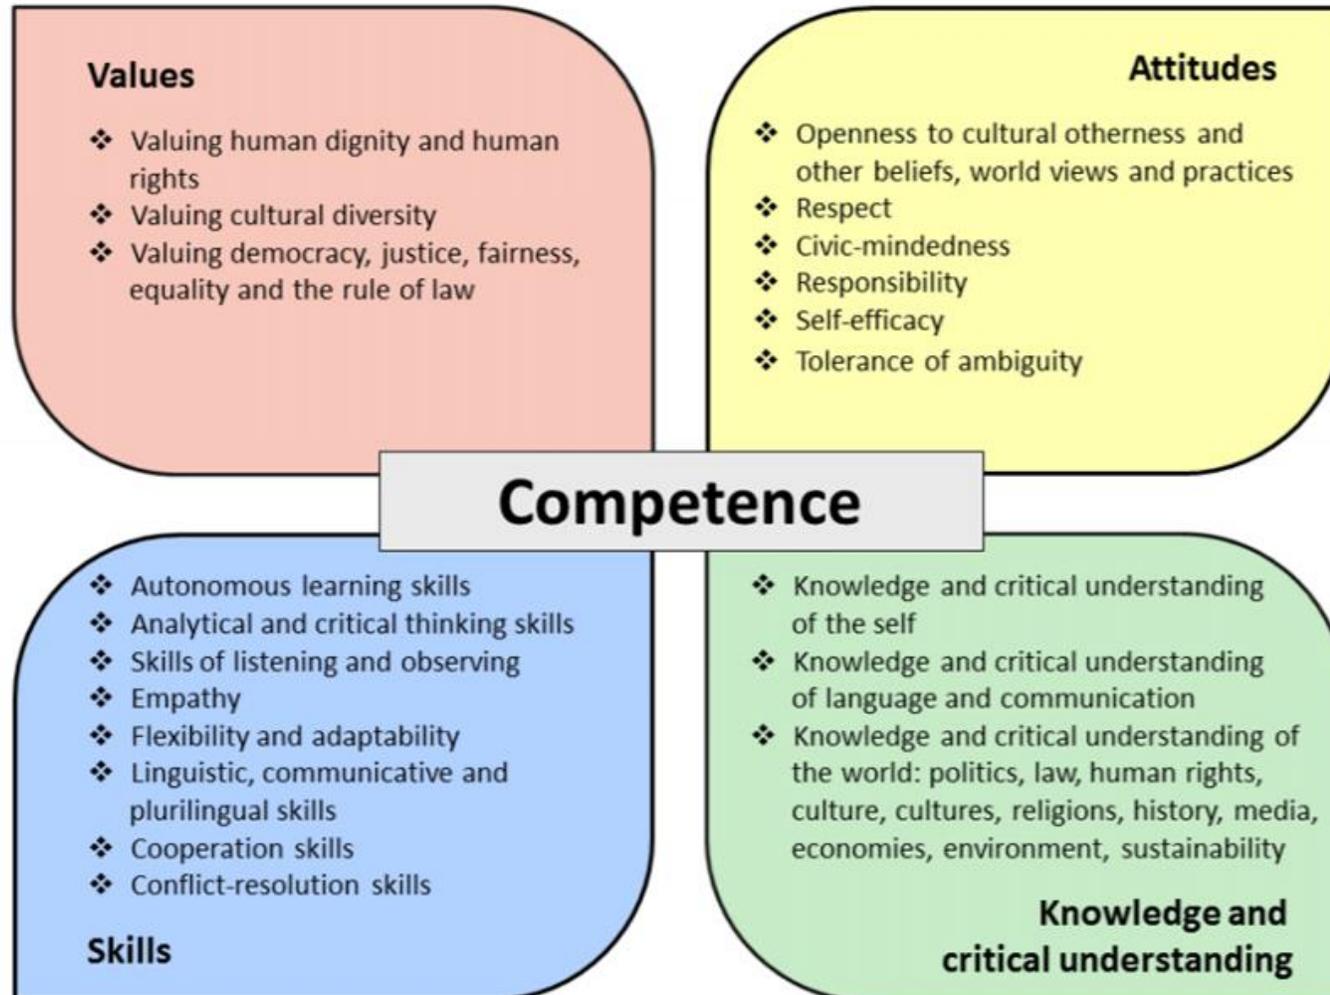

1. Need for CE:

- Lower trust in political system and democracy
- Decrease in political engagement
- Globalization, ethnic and cultural diversity requires openness and communication
- Equal opportunities for all students to learn about citizenship

2. Opportunities of CE:

- It can help student autonomy, participation and solidarity
- Schools are 'living labs' for citizenship

Content of CE – What do we look for?

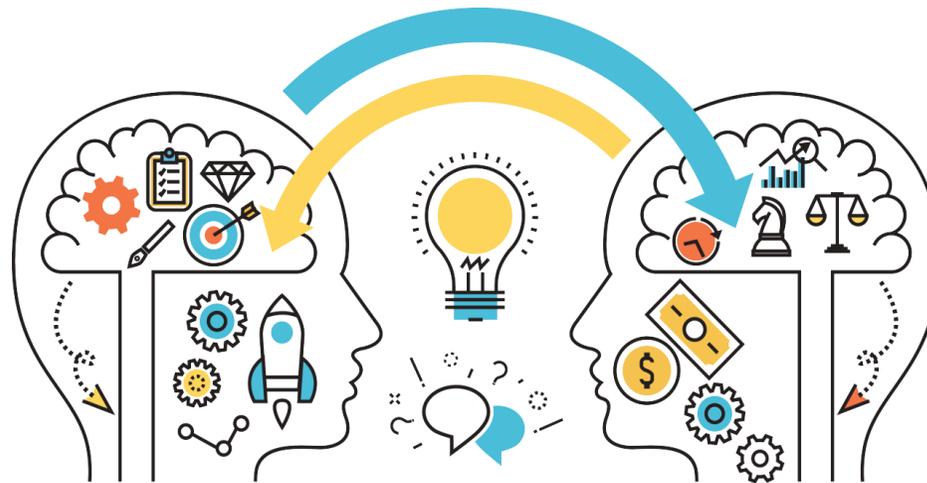

Why competence based?*

- You need knowledge, skills, attitudes and values to successfully climb a mountain
- You need knowledge, skills, attitudes and values to analyse war and the consequences for refugees in the past en present
- You need to be able to plan, carry-out and present problem-solving related to personal finances

CE Competences

- Knowledge, skills, attitudes and values
 - Not necessarily because one knows a lot about e.g. democracy one will have democratic values

Changes in CE

- Content of CE widens: e.g. digital citizenship, care for the environment, ...
- Geographical scope: local – national or global scope

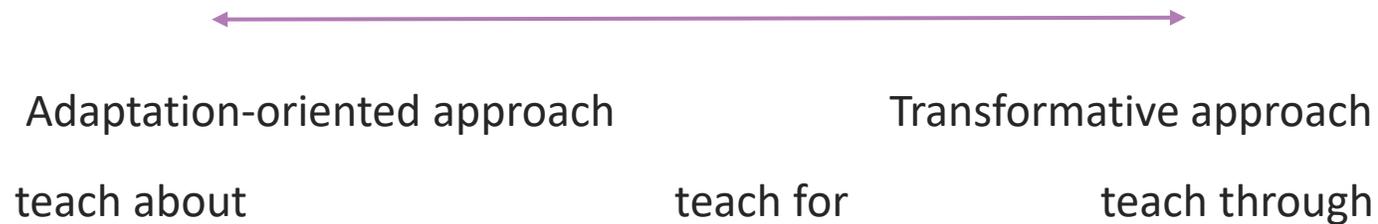

Different approaches to teaching CE

- **What is taught?**

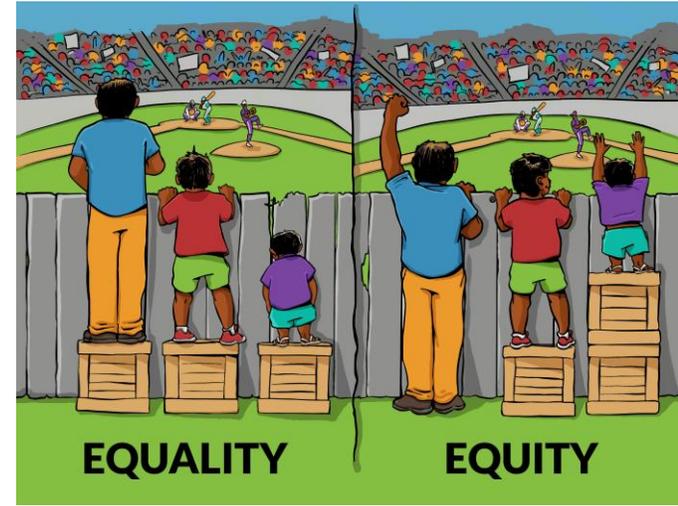

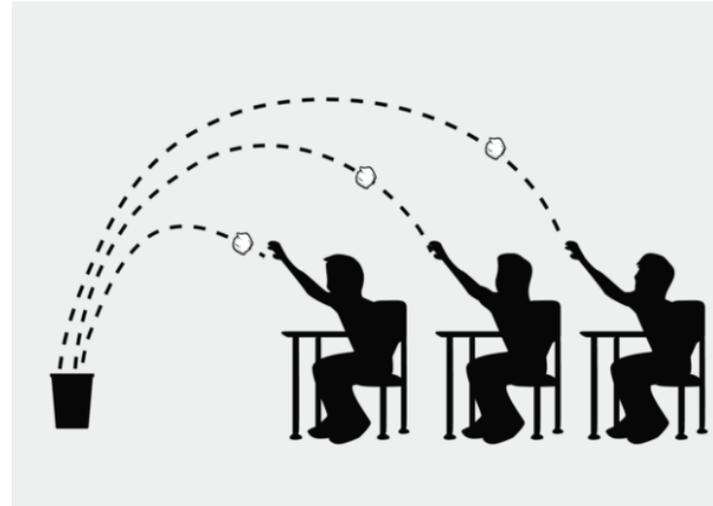

- **How is it taught?**

Examples of these approaches

Soft approach

Critical approach

Examples of these approaches*

Adaptation- orientation approach

Transformative approach

Didactical perspectives on democracy education

- To teach about democratic education:
 - the political system, the institutions and about human rights
- To teach through democratic education:
 - Vygotsky/Dewey: Sociocultural- approach to learning
 - experiences of democratic processes
- To teach for democratic education:
 - to prepare the students to participate
 - relate the content of the subject to the students' life
 - motivation and capability to be "change-makers"

Organisation on CE

1. HOW IS IT ORGANIZED IN SCHOOLS? (UNESCO, 2015)

1. As a school-wide issue
2. As a cross-curricular issue e.g., through projects
3. As an integrated component within different subjects
4. As a separate, stand-alone subject within the curriculum

	Curricular structure			Compulsary
	Cross-curricular	Integrated in particular subjects	Specific subject	
Norway	X	X		X
Lithuania	X	X	X	X
Belgium (Flanders)	X			X
Czech republic		X	X	X
Bulgaria	X	X	X	X
Slovenia	X	X	X	X
Italy	X	X		X

Thank you!

Discussion

- Discussion in your group the following questions:
 - 1) What CE learning objectives are central in your subject and in your school? Give some examples
 - 2) How is CE organized in your subject and your school?
 - 3) Which challenges are you confronted with?
- Gather the discussed information in this padlet

Citizenship competences

- It is centered around 20 competences that we clustered around 8 categories:
 1. Learning
 2. Communicating
 3. Understanding
 4. Valuing
 5. Awareness of self (and own community)
 6. Awareness of others
 7. Tolerance
 8. Responsibility

ALICE
